

Microwave/MMwave

- Signal Generators
- Signal and Spectrum Analyzers
- Network Analyzers
- Noise Figure Analyzers
- Microwave Power Meter
- RF/Microwave Comprehensive Testers
- Microwave Test Accessories

Optoelectronic

- Optical Spectrum Analyzers
- Optical Fiber Splicer
- OTDR
- Optical Sources
- Optical Power Meters
- Optical Attenuators
- Infrared & Ultraviolet Laser Tests

Communication

- Digital Communication
- Radio Communication
- Radio & TV Network

Fundamental

- Digital Oscilloscopes
- Photovoltaic Instruments
- Programmable Power

Featured Ceyear Product:

AV3672 Series Vector Network Analyzers

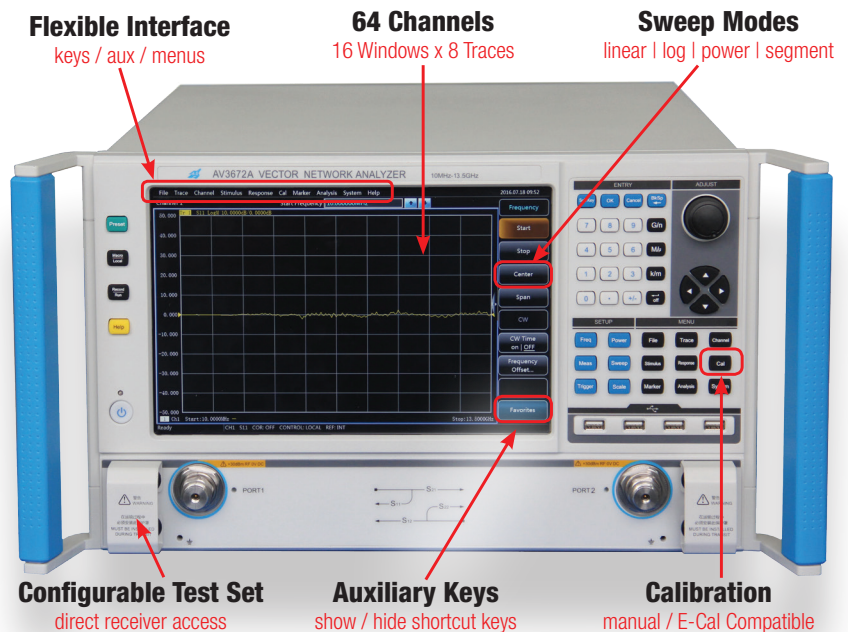

OPERATING RANGES UP TO 67 GHz

PRICE STARTING AT

\$44,000

35% less than comparable models

- 2-Port or 4-Port Configurations
- Flexible and optional calibration types
- Compatible with multiple calibration kits
- Supports up to 16 Windows x 8 Channels
- Fast & easy setup of complex test schemes
- Available in multiple display formats such as logarithmic amplitude, linear amplitude, standing-wave, phase, Smith chart
- USB, GPIB, LAN and VGA display interface
- 12.1inch high resolution touch screen
- One-click operation (Record and Run)
- Available measurement functions:
 - Pulse S parameter
 - Time-domain
 - Mixer
 - Gain compression two-dimensional sweep
 - MMwave frequency extension up to 500 GHz
 - Antenna / RCS
