

Wide-Band CURRENT MONITORS

Pearson Electronics designs and manufactures current monitors for accurate beam current measurement applications "*in-the-beam tube*" (fixed placement) and "*outside-the-beam-tube*" (clamp-on) packages.

Since 1955, Pearson Electronics has produced current monitors that can measure from sub-milliamp currents with pulse rise times as fast as 1.0 nanoseconds accurately and can be hardened against neutron radiation.

We stock a large variety of models for immediate delivery and design customs for OEM applications.
